Skills

- Leadership
- Problem-solving
- Adaptability
- Time management
- Communication
- Self-learning

Expertises

- JavaScript & TypeScript
- TailwindCSS
- React.JS & Next.JS
- Node.JS & Express.JS
- MongoDB
- SQL
- Git
- Figma
- Docker

Language

- Thai (Native)
- English (Intermediate)

Certificate

- Junior Software Developer Cohort#4

Joakim Dahlstrom

Full-Stack Developer

As an experienced web developer proficient in NextJS, TypeScript, and React, I specialize in translating design concepts into functional web applications. My journey began with successfully developing CRM projects as a freelance developer. I then advanced to a Full-Stack Developer role at Devdeva, where I honed my expertise in technical areas like deployment and query, aggregate complex data skills. Additionally, I learned soft skills such as teamwork, problem-solving, and effective communication with both team members and clients. Eager to enhance my abilities and contribute to impactful projects, I am seeking opportunities to progress as a junior to mid-level software developer within a collaborative and nurturing team setting.

Experiences

Fullstack Developer | Devdeva 07/2023 - Present

- Adeptly functioning as both a backend and frontend developer across multiple projects, with proficiency in deployment, aggregate, and query complex data,
- Collaborated with team members and clients to ensure web application development was perfectly aligned with project requirements. This involved understanding client concerns and creatively using our services to meet their needs effectively.
- Conducted thorough code reviews for team members to enhance code performance, thereby ensuring the delivery of exemplary products to clients.
- Engaged in the development of back-office web applications like customer relationship management and inventory management systems.
- Researched and implemented best practices such as utilizing tools like Biome for linting and formatting code, ensuring all team members were aligned and working efficiently towards shared objectives, ultimately improving outcomes.
- Contributed to the recruitment process for new developers by participating in candidate interviews and technical test evaluations, thereby augmenting team competence and growth

Freelance Software Developer | Dataslot 05/2023 - 07/2023

- Engage in thorough communication with clients to ensure a precise understanding of project requirements.
- Proactively solicit feedback from senior developers and project managers to enrich project quality and efficiency.
- Offer post-delivery maintenance and support to guarantee the seamless operation of completed projects.
- Devised an Order Management System module facilitating internal expense and purchase order filtering from external entities.
- Implemented authentication through Auth0, incorporating social login options such as Line, Facebook, and Google, each linked to a unified email.
- Key Tools: Next.JS, TypeScript, DynamoDB, AWS-SDK, Axios, Auth0

Learner | Generation Thailand 02/2023 - 06/2023

- Successfully completed a comprehensive four-month professional training program focused on software development, acquiring practical knowledge in both front-end and back-end development.
- Acknowledged by Generation Thailand for mentoring and tutoring peers during the boot camp, a recognition received for impactful contributions.
- Engaged in collaborative efforts with seasoned developers, benefiting from their guidance and constructive feedback to refine and advance skill sets.
